# 1. Operating Results and Financial Position

## (1) Analysis of Operating Results

During the fiscal year under review, the Japanese economy faced a severe situation in the first half of the year, given the effects of the restrictions in the electric power supply and the accident at the nuclear power plant. However, the economy gradually began to recover in the second half of the year. Overall, with concerns lingering over the economic slowdown linked to the debt crisis in Europe, the surge in crude oil prices, and the strong yen, economic conditions remained severe.

In the instant noodle industry, the core business of the NISSIN FOODS Group, the market was revitalized by a temporary increase in demand in the wake of the earthquake and the aggressive introduction of new products by competitors from the summer. However, given the surge in prices of wheat and other raw materials, the industry experienced an increasingly severe business environment.

In this environment, to respond to the diversifying needs of consumers, the Company continued to focus on product development by taking advantage of the Group's technical strength, and sought to further strengthen its brand value. To deal with the rapid growth of the overseas instant noodle market, particularly in emerging economies, the Company is also continuing to execute its global strategies with an emphasis on speed.

As a result, in the consolidated results for the fiscal year under review, net sales increased 1.5% from the previous fiscal year, to ¥380,674 million. Operating income fell 24.1%, to ¥26,211 million, and ordinary income decreased 22.8%, to ¥28,099 million, while net income declined 10.7%, to ¥18,538 million.

The following is an overview of performance by reportable segment:

### (i) Nissin Food Products

At the beginning of the fiscal year under review, the Company made a strong effort to supply its products on a priority basis to support the victims of the Great East Japan Earthquake, which struck on March 11, 2011. After the earthquake, as consumers again realized the importance of instant noodles as foods at the time of an emergency, sales of the *Cup Noodle* series and the *Nissin-no-Donbei* series continued to grow steadily. As a result of support from consumers for the extended period, the *Cup Noodle* series commemorated the 40th anniversary of their launch, and accumulated domestic sales exceeded 20 billion units in the fiscal year under review.

New proposal-type products that had been developed using new technologies also contributed to the higher sales. Particularly, in the *Cup Noodle Gohan* series, *Nissin Yakisoba U.F.O. Sobameshi*, which was launched nationwide in March, attracted a great deal of attention from consumers.

As a result, net sales in this reportable segment stood at ¥199,284 million, up 1.6% year on year. The segment income came to ¥20,516 million, a decrease of 9.9% from the previous fiscal year.

### (ii) Myojo Foods

During the fiscal year under review, sales of the *MYOJO CHARUMERA* series, the main brand of Myojo Foods, remained steady through the year. In particular, *MYOJO CHARUMERA CHANPON*, which was launched in September 2011, achieved great popularity by proposing a new cooking method in which noodles and soup are cooked together. Sales of the *MYOJO CHUKAZANMAI* series, which offers an authentic Chinese flavor, rose significantly, as did those of the *YAMUCHAZANMAI* series, a range of healthy cupped soup with harusame noodles that is easily prepared yet tasty. However, with a slump in sales of open price products, such as the *HYOBANYA* and *DESSE* series, overall sales declined from the previous fiscal year.

As a result, net sales in this reportable segment stood at ¥42,005 million, down 1.3% year on year. The segment income came to ¥2,753 million, an increase of 13.4% from the previous fiscal year, mainly reflecting a cutback in advertising expenses.

### (iii) Chilled and frozen foods

Of the products of NISSIN CHILLED FOODS CO., LTD., sales of *Chukafu Ryanmen*, the mainstay of chilled products, remained strong in the first half of the year. Meanwhile, the *Chukazanmai Hiyashichuka* series, a chilled product manufactured based on the flavor of *CHUKAZANMAI*, the pillow-type instant noodles of MYOJO FOODS CO., LTD., enjoyed robust popularity. Sales of the *Gyoretsu-no-Dekiru-Mise-no-Ramen* series, a long seller brand that was celebrating its 15th year, and those of *Hiruzen-Fu Yakisoba*, a reproduction of the menu that won the B-1 Grand prix, among other products were also strong.

Sales of NISSIN FROZEN FOODS CO., LTD. rose, largely reflecting the extremely strong sales of the *Reito Nissin Spa-O Premium* series, a product popular with housewives as a weekday lunch, and the *Reito Nissin Spa-O Chef's Premium* series, a high-end authentic pasta product that consumers can enjoy at home. Sales of *Reito Nissin Futomen Doudou Tsukemen* were also steady. This product uses extra-thick straight noodles that have a pleasantly chewy and satisfying texture that had never been available in the market before.

As a result, net sales in this reportable segment, chilled and frozen foods, stood at ¥53,434 million, up 4.1% year on year. Segment income, however, fell 13.8% from the previous fiscal year, to ¥1,565 million.

(iv) The Americas

In the Americas, sales of *Top Ramen*, *Cup Noodles*, *Bowl Noodles*, and *Big Cup Noodles*, a new product, were solid. However, principally reflecting the effects of exchange rate fluctuations, net sales in this reportable segment, the Americas, declined 7.6% year on year, to ¥24,431 million. The segment loss stood at ¥340 million, due to the surge in prices of raw materials such as wheat.

(v) China

In China, sales of *Hap Mei Do*, *Kai Bei Le* and other cup-type instant noodles were strong, despite effects of exchange rates. As a result, net sales in this reportable segment, China, stood at ¥18,694 million, up 1.7% year on year. Segment income rose 5.5% from the previous fiscal year, to ¥1,042 million, despite the surge in prices of raw materials and higher sales costs from active sales promotion.

Net sales in the "Other" reported segment were ¥42,825 million, up 6.8% year on year. Segment income rose 17.7% from the previous fiscal year, to ¥2,058 million.

Note: Segment income is reconciled to operating income of the consolidated statements of income.

(Outlook for the Fiscal Year Ending March 31, 2013)

In the fiscal year ending March 31, 2013, although the Japanese economy is likely to stage a gradual recovery on the strength of demand related to reconstruction from the earthquake and a recovery in the employment situation, its outlook is likely to remain uncertain, influenced by the effects of the debt crisis in Europe and the prolonged appreciation of the yen and surge in crude oil prices.

Domestic consumption remains steady at present, but the population is steadily declining and clearly aging, while consumers' needs have been diversifying.

In this environment, the NISSIN FOODS Group will develop products that meet consumers' needs, and will create proposal-type products by drawing on the Group's superior technological strength. Through these initiatives, the Group will strive to further improve its brand value. It will also continue to take steps to respond to the rapidly growing overseas instant noodles market, mainly in emerging economies.

With respect to operating results for the fiscal year ending March 31, 2013, we forecast a year on year increase of 5.1% in net sales, to ¥400,000 million. With respect to profit, we project a rise of 3.0% in operating income, to ¥27,000 million, an increase of 6.8% in ordinary income, to ¥30,000 million, and a rise of 2.5% in net income, to ¥19,000 million.

Projected exchange rates for major currencies used in results forecasts for overseas subsidiaries are ¥78 to US\$1.00, ¥10 to HK\$1.00, and ¥12 to CNY1.00.

## (2) Analysis of Financial Position

### (Assets, Liabilities, Net Assets)

The financial position as of March 31, 2012 is as follows:

#### (Assets)

Total assets increased ¥4,968 million from the end of the previous fiscal year, to ¥414,717 million. This change was mainly attributable to an increase in current assets of ¥7,688 million, chiefly due to a rise in cash and deposits, which outweighed a decline of ¥2,671 million in investments and other assets, mainly reflecting the reversal of deferred tax assets as a result of retirement benefits payments and the revision of tax laws.

#### (Liabilities)

Total liabilities fell ¥4,093 million from the end of the previous fiscal year, to ¥128,060 million. This fall reflected a decline of ¥7,303 million in long-term liabilities, chiefly attributable to a decline in accrued retirement benefits to employees, offsetting a rise of ¥3,210 million in current liabilities, mainly reflecting an increase in payables.

#### (Net Assets)

Net assets rose ¥9,061 million from the end of the previous fiscal year, to ¥286,657 million. This increase chiefly reflected an increase of ¥10,307 in retained earnings.

As a result, the equity ratio rose from 66.3% at the end of the previous fiscal year, to 67.6%.

#### (Cash Flows)

Consolidated cash and cash equivalents (hereinafter called net cash) at the end of the fiscal year under review stood at ¥71,740 million, an increase of ¥9,783 from the end of the previous fiscal year, as net cash provided by operating activities was ¥32,604 million, while net cash used in investing activities was ¥12,831 million, and net cash used in financing activities was ¥9,442 million.
