## 1. Analysis of Operating Results and Financial Position

### (1) Qualitative Information Concerning Consolidated Business Results

During the consolidated fiscal year under review, the outlook for the global economy remained uncertain due to uncertainties caused by risks such as intensifying US-China trade disputes, US-Iran confrontation and the wake of coronavirus disease 2019 (COVID-19). In Western countries, although the increase of personal consumption and the number of employees showed signs of recovery, the expansion of coronavirus disease 2019 (COVID-19) depressed the economy. In Asia, economies are beginning to suffer a setback in the pace of growth given the growing concerns regarding a downside risk involved in China's economy amid the trade frictions between the United States and China, the expansion of coronavirus disease 2019 (COVID-19) and the decline in personal consumption.

In Japan, although the employment and income situation was improving, the economy slowed down and the situation was tough due to the impact of the consumption tax hike on consumer sentiment and the expansion of coronavirus disease 2019 (COVID-19).

In the instant noodles industry, total worldwide demand increased to more than 100 billion units following from previous year, reflecting growth in demand in many regions including Asian emerging countries. On the other hand, domestic total demand fell below the previous year.

Under this environment, based on the "Medium-Term Management Plan 2021" of which term covers five years from the fiscal year ended March 31, 2017, to realize the improvements of "Earning power through operations" and "Value in capital markets," we are working on the following strategies: 1) Promoting global branding, 2) Focusing on priority overseas locations, 3) Laying stronger foundations for our domestic profit base, 4) Establishing a second pillar that generates revenue and profit and 5) Developing and strengthening human resources for global management.

(¥ Million)

	FY 2019	FY 2020	Year on year	
	(From April 1, 2018 to March 31, 2019)	(From April 1, 2019 to March 31, 2020)	Amount	%
Revenue	450,984	468,879	17,894	4.0
Operating profit	28,967	41,252	12,285	42.4
Profit before tax	31,166	42,650	11,483	36.8
Profit attributable to owners of parent	19,356	29,316	9,960	51.5

The following is an overview of performance by reportable segment:

#### 1) NISSIN FOOD PRODUCTS

NISSIN FOOD PRODUCTS achieved year-on-year growth in sales with a rise in sales of cup-type noodles year-on-year. Sales increased in cup-type noodles year-on-year, where the CUP NOODLE MISO, featuring rich miso soup, were strong, and the ASSARI OISHII CUP NOODLE series and the CUP NOODLE BIG series contributed to sales. In bag-type noodles, the OWAN DE TABERU series maintained strong sales, although sales of bag-type noodles decreased. In addition to normal demand for cup-type noodles and bag-type noodles, the increased demand for products due to the self-restraint in response to the expansion of coronavirus disease 2019 (COVID-19) contributed to sales. Meanwhile, profits increased year on year, due to increase in profit in nature of increase in sales, although reflecting higher depreciation expenses associated with the launch of the Kansai Plant as well as an increase in logistics costs.

Consequently, revenue was ¥ 201,314 million (+4.2%) and operating profit was ¥ 27,573 million (+16.3%) in this reportable segment.

## 2) MYOJO FOODS

MYOJO FOODS achieved year-on-year growth in sales of cup-type noodle products, reflecting strong sales of the MYOJO CHARUMERA series and the MYOJO CHUKA ZANMAI series. Other contributors to the higher sales are open-price products. In bag-type noodle products, sales achieved year-on-year growth, reflecting stable sales of the MYOJO CHARUMERA series and strong sales of the MYOJO HYOUBANYA series. In addition, the increased demand for products caused by stay-at-home request to combat coronavirus diseases 2019 (COVID-19) also contributed to the sales growth. Meanwhile, profits increased year on year, reflecting a price revision implemented in June 2019 and increased in sales volume, although increased in logistics costs and personnel costs.

Consequently, revenue was ¥ 36,532 million (+11.1%) and operating profit was ¥ 2,193 million (+7.4%) in this reportable segment.

## 3) Chilled and frozen foods

At NISSIN CHILLED FOODS, sales of its main brand GYORETSU NO DEKIRU MISE NO RAMEN series, TSUKEMEN NO TATSUJIN series, NISSIN NO RAMENYASAN series and NISSIN NO FUTOMEN YAKISOBA series were strong due to the demand expansion for products caused by stay-at-home request to combat coronavirus disease 2019 (COVID-19) and the sales decrease reflecting weak demand for chilled noodles in the unseasonable summer weather and sales declined due to the warm winter was offset. However, overall sales decreased year on year, reflecting the decrease in the other route sales.

NISSIN FROZEN FOODS achieved sales growth, helped by the NISSIN MOCHITTO NAMA PASTA, a mainstay product, the NISSIN SPA OH PREMIUM series, and the NISSIN CHUKA SHANGHAI YAKISOBA OMORI, the NISSIN GOOTA, and NISSIN CHUKA SHIRUNASHI TANTANMEN OMORI, all of which grew stably in terms of sales and the demand expansion for products caused by stay-at-home request to combat coronavirus disease 2019 (COVID-19). Meanwhile, profits decreased year on year, reflecting an increase in raw material prices and logistics costs.

Consequently, revenue was ¥ 57,306 million (+3.4%) and operating profit was ¥ 1,410 million (-8.1%) in this reportable segment.

## 4) The Americas

The Americas are working to enhance the proposal of premium products aimed at creating new demand, enhancing the profitability of existing products. Sales of NISSIN LAMEN, a core product in Brazil, contributed to remain firm, and sales of the CUP NOODLES increased strongly. Successful sales promotions for premium products in the United States also contributed to the overall sales growth in the segment. The increased demand for products due to the expansion of coronavirus disease 2019 (COVID-19) also contributed to sales. Profits increased due to factors such as the effect of price revisions and sales increase of premium products.

Consequently, revenue was ¥ 65,922 million (+3.9%) and operating profit was ¥ 4,080 million(+ ¥ 9,315 million) in this reportable segment.

## 5) China

In China, the market for high value-added products is expanding in mainland China. The Group has taken steps to expand its geographical sales area and strengthen its CUP NOODLES brand. In addition, in the wake of coronavirus disease 2019 (COVID-19), the stay-at-home economy during the period of fourth quarter has increased higher demand for premium instant noodles. In this environment, sales increased year on year thanks to strong volume of cup-type noodles in mainland China and bag-type noodles in Hong Kong, mainly in the CUP NOODLES brand and DEMA E ICCHO brand. Profit increased year on year due to increase in sales volume in mainland China and Hong Kong, and cost reduction associated with increase in volume.

Consequently, revenue was ¥ 43,083 million (+3.9%) and operating profit was ¥ 4,865 million (+26.6%) in this reportable segment.

Revenue in “Other,” which includes business segments not included in reportable segments such as domestic confectionary, beverages, Europe and Asia was ¥ 64,719 million (+0.3%) and operating profit was ¥ 6,619 million (-42.1%).

(5) Notes to Consolidated Financial Statements

(Notes on premise of going concern)

(Reporting entity)

NISSIN FOODS HOLDINGS COMPANY LIMITED (hereinafter, “the Company”) is a stock company domiciled in Japan. The addresses of its registered head office and main offices are disclosed on the Company’s website ([https://www.nissin.com/en\\_jp/](https://www.nissin.com/en_jp/)). The Company’s consolidated financial statements comprise the Company and its subsidiaries (hereinafter, “the Group”) and interests in the Company’s associates.

Details of each business and principle activity of the Group are described in Note “Segment information.”

(Basis of preparation)

1) Compliance with IFRS

The consolidated financial statements of the Group have been prepared in accordance with IFRS. Since the requirements for “Specified Company of Designated International Accounting Standards” set forth in Article 1-2 of the “Ordinance on Terminology, Forms, and Preparation Methods of Consolidated Financial Statements” are satisfied, the Group adopts the provisions of Article 93 of the same Ordinance.

The Group's consolidated financial statements were approved by the Board of Directors held on May 11, 2020.

2) Basis of measurement

The Group’s consolidated financial statements have been prepared on an acquisition cost basis, except for specific financial instruments measured at fair value.

3) Functional currency and presentation currency

The Group’s consolidated financial statements are presented in Japanese yen, which is also the Company’s functional currency, and amounts of less than one million yen are rounded off to the nearest million yen.

(Significant accounting policies)

No items to report except “(Changes in accounting policies)”

(Changes in accounting policies)

During the consolidated fiscal year under review, the Group adopted IFRS 16 Leases (announced in January 2016, hereinafter referred to as “IFRS 16”). Upon applying the IFRS 16 standard, the Group has chosen a transition option to recognize the cumulative effect of applying the new standard at the date of initial application.

Upon applying the IFRS 16 standard, the Group has chosen the practical expedient described in paragraph C3 of the IFRS 16 to determine whether an arrangement contains a lease, as previously identified in accordance with IAS 17 Leases (hereinafter “IAS 17”) and IFRIC 4 *Determining whether an Arrangement contains a Lease*. The requirements of IFRS 16 apply to all contracts that have been entered into since the date of the initial application. As a lessee, the Group recognized right-of-use assets and lease obligations on the date of initial application in relation to the leasing contracts previously classified as operating leases in accordance with IAS 17. The lease obligations are measured as the present value of residual lease payments discounted using the incremental borrowing rate on the date of initial application. The weighted average of the incremental borrowing rate is 1.4%. The right-of-use assets are measured initially as an amount equal to the lease liability adjusted for prepaid lease payments.

For a lessee’s lease assets classified as finance lease contracts in accordance with IAS 17 in the past, right-of-use assets and lease liabilities on the date of initial application are measured as amounts equal to lease assets and lease obligations, respectively, on the books prepared prior to the date of initial application in accordance with IAS 17.

The gap in the amount between the future minimum lease payments (discounted to the present value using the incremental borrowing rate as mentioned earlier) under non-cancellable operating leases disclosed in accordance with IAS 17 at the end of the consolidated fiscal year preceding the date of initial application, and the lease liabilities recognized on the consolidated statement of financial position as of the date of initial application was primarily attributable to the differences in estimated values for land and buildings that are to be used longer than the initial non-cancellable period.

Accordingly, the Group booked right-of-use assets at ¥ 20,659 million and lease liabilities at ¥ 19,558 million on the date of the IFRS 16 initial application. This matter will have no material impact on operating income or net earnings. Upon applying IFRS 16, the Group adopts the following practical expedient.

- Reliance on assessment to determine whether it will be disadvantageous for a lease to apply IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* prior to the date of initial application as an alternative method of impairment testing.
- Exclusion of initial direct costs from the right-of-use assets measured as of the date of initial application.

(Segment Information)

1) Outline of reportable segments

The Group's reportable segments are components of the Group for which separate financial information is available and regular evaluation by the Board of Directors is being performed in order to make decisions about resources to be allocated and assess its performance.

The Group employs holding company system of seven operating companies in Japan and four overseas business regions as strategy platforms, the reportable segments consist of "NISSIN FOOD PRODUCTS," "MYOJO FOODS," "Chilled and frozen foods," "The Americas" and "China." The segments of "NISSIN FOOD PRODUCTS," "MYOJO FOODS," "The Americas" and "China" are operating the business of manufacturing and selling cup- and bag-type noodles. The "Chilled and frozen foods" segment is operating the business of manufacturing and selling chilled and frozen foods.

2) Segment revenues and performance

The accounting methods of reportable business segments are generally the same as the Group's accounting policies described in "Significant accounting policies". Figures reported as segment profit are based on the operating profit reported in the condensed quarterly consolidated statements of income. Revenue from intersegment transactions and transfers are based on the current market prices.
